📄 Summary

Backend Software Engineer with 4+ years of experience building and modernizing backend systems across cloud and enterprise environments. Strong background in **Node.js, TypeScript, Ruby on Rails, AWS, and PostgreSQL**, with experience in scalable APIs, system modernization, distributed workflows, and business-critical systems. Experienced in **architecture, performance, security, observability, and automated testing**.

🧰 Experience

TotalPass Brasil, Backend Software Engineer 07/2025 – Present | São Paulo, Brasil

- Develop and modernize **core backend systems** supporting B2B acquisition, corporate onboarding, and critical HR Growth workflows.
- Delivered solutions focused on **reducing financial delinquency, protecting revenue, and improving payment behavior** as the customer base scaled.
- Contributed to **backend architecture modernization and international expansion**, improving system modularity, scalability, maintainability, and migration safety.
- Optimized **critical backend flows**, improving performance, asynchronous processing, reliability, and observability across business-critical services.
- Strengthened **application security** and engineering practices while contributing to architectural decisions, technical improvements, and AI-assisted software development.

Venturus - Apple Inc., Backend Software Engineer 11/2022 – 06/2025 | São Paulo, Brasil

- Worked across **three software projects supporting Apple's global Hardware Test Engineering organization**, contributing to manufacturing quality, operations, and factory infrastructure.
- Developed backend solutions for **production image analysis and anomaly detection**, supporting manufacturing quality validation through data processing and machine learning workflows.
- Built systems for **remote configuration and management of manufacturing lines**, enabling configuration workflows across production facilities worldwide.
- Modernized a legacy manufacturing capacity-planning platform, migrating core backend functionality and automating **factory station sizing and production capacity calculations**.
- Worked across **backend engineering and QA**, collaborating with distributed international teams under enterprise-level quality, security, and delivery standards.

Technologies: Node.js, TypeScript, Python, AWS, React, Vue.js, Machine Learning, AI.

🎓 Education

B.Sc. Computer Science, Universidade Cruzeiro do Sul 2024 – 2028

Currently pursuing a degree focused on **Computer Science fundamentals, software engineering, algorithms, data structures, databases, and computational systems**.

Software Engineering / Full-Stack Development, Trybe 2021 – 2022

Completed an intensive **1,500+ hour program** covering **Computer Science, Front-end and Back-end development, software engineering, Agile methodologies, and professional development practices**.

🧠 Top Skills

Backend

Node.js, TypeScript,
Ruby, Ruby on Rails,
Python

Cloud & Infrastructure

AWS, Docker,
Kubernetes

Databases

PostgreSQL, Redis

Engineering

REST APIs, System
Design, Distributed
Systems, Automated
Testing, CI/CD,
Observability,
Application Security
